I. Epidemiological profile

Population

- High transmission (>1 case per 1000 population): 4,800,000
- Low transmission (0-1 cases per 1000 population): 0

Malaria free (0 cases): 4,800,000

II. Intervention policies and strategies

- ITN: ITN/LLINs distributed free of charge
- IRS: WHO-recommended
- IPT: G6PD test is a requirement before treatment with primaquine
- ACD: ACD of fever cases at community level
- Treatment: ACT is free for all ages in public sector
- Diagnosis: Malaria diagnosis is free of charge in the public sector

III. Financing

- Sources of financing
- Funding by intervention in 2014

IV. Coverage

- ITN and IRS coverage

V. Impact

- Confirmed malaria cases per 1000 and ABER

Impact: Insufficiently consistent data to assess trends
